Your Price: \$299.00. Description. *If your facility currently uses POEP you have free access to these tools. See your POEP administrator at your facility. The perinatal competency validation tools include thirty-eight checklists and three simulation tools. Competency is the application of knowledge and the interpersonal, decision-making and psychomotor skills expected for the practice role according to the role and professional nursing standards.

AWHONN - Product Details

Nursing competence can be defined as possession of the requisite knowledge and technical skills related to a specific area of professional clinical practice. Validation of competence implies both an evaluation of the nurses' level of knowledge and verification of their clinical skills. For many reasons that will be discussed in this chapter, most current methods of competence validation for nurses who use electronic fetal monitoring (EFM) fall short of achieving these goals.

Electronic Fetal Monitoring Competence Validation | Obgyn Key

This competency framework has been developed for all staff working to support mothers and families across the perinatal care pathway, from preconception to postnatal care. It is designed to increase general awareness of perinatal mental health disorders and associated care skills, supporting advanced and specialist practice.
