Pine Organic Chemistry - hokage.iaida.ac.id

Pine scent comes from a collection of molecules known as volatile organic compounds (VOCs). When trees emit these chemicals, they can react with oxidants to form other pollutants like particulate matter and ozone, both of which can impact climate change and also respiratory diseases, potentially even COVID-19.

The forest for the trees | Department of Chemistry and ...

Specific components are alpha-pinene, beta-pinene, delta-3 carene, and sabinene, the monocyclic terpenes limonene and terpinolene, and smaller amounts of the tricyclic sesquiterpenes,
